

RAGHOOL M

Thoothukudi, Tamil Nadu, India — +91 8608383248 — raghoolbecse@gmail.com

[Portfolio](#) — [LinkedIn](#)

PROFESSIONAL SUMMARY

BE Computer Science and Engineering Graduate with hands-on experience in full-stack web development, strong knowledge of data structures and algorithms, and exposure to cloud platforms and machine learning fundamentals. Skilled at building responsive web applications and applying analytical thinking to solve real-world technical problems.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering	2022 – 2026
Government College of Engineering, Dharmapuri	CGPA: 7.6 / 10.0
Class 12th – State Board	2022
St. Francis Xavier's Higher Secondary School, Thoothukudi	88.3%
Class 10th – State Board	2020
Bell Matriculation Higher Secondary School, Thoothukudi	87.8%

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, C++ (Basics)
- **Web Technologies:** HTML5, CSS3, JavaScript, React.js, PHP
- **Database:** MySQL, SQL (DDL, DML, Joins), Relational Database Management (RDBMS)
- **Tools & Platforms:** Git, GitHub, VS Code, Google Cloud Platform
- **Concepts:** Data Structures and Algorithms, Object-Oriented Programming, Machine Learning Fundamentals

PROFESSIONAL EXPERIENCE

Web Developer Intern — Rail Infotech Services (Southern Railway) **June 2025 – Aug 2025**
Spearheaded the development of responsive internal web interfaces using HTML5 and Bootstrap to streamline the Quarters Management System. Collaborated with cross-functional railway departments to translate complex user requirements into functional UI components. Integrated Python-based backend logic with relational databases to automate training schedule workflows. Improved platform reliability by executing comprehensive unit testing, debugging, and technical documentation for mission-critical intranet applications.

KEY PROJECTS

Multimodal Deepfake Detection System *Python, PyTorch, Scikit-learn, Flask, OpenCV, Transformers*
Developed a real-time deepfake detection system using video, audio, and lip-sync analysis. Extracted features using ViT, WavLM, and SyncNet, and applied machine learning models for classification. Improved accuracy and reduced false positives using multimodal fusion and ensemble methods.

Expense Tracker Application (Naan Mudhalvan) *HTML, CSS, JavaScript, React.js*
Developed a web-based application to track daily expenses and manage monthly budgets. Implemented budget alert functionality to notify users when spending exceeds limits. Designed interactive visualizations, including pie charts and bar graphs, for expense analysis.

CERTIFICATIONS

- **Web Development Intern** – [Rail Infotech Services, Southern Railways](#)
- **Java, Python, C++** – [Cybernaut Edu-Tech](#)
- **Data Analytics** – [Google](#)
- **Google Cloud Engineering** – [Google](#)
- **Fundamentals of Deep Learning** – [NVIDIA](#)
